

Introducing South Shore FD

On January 1st, 2009 the **South Shore Fire & EMS Department** officially began operation. The Village of Mount Pleasant and the Village of Sturtevant established a Fire Department to serve both communities more efficiently. The combination of personnel has allowed enhanced response areas, improved supervision, and streamlined training. As a business owner you will get a chance to meet your new Fire Department during routine inspections. Personnel will be interested in business operations and the layout of the structure. Local business inspections prepare crews to respond to emergencies at or near the facility. Fire inspections also provide

you with fire prevention tips, help with safety issues, and correction of fire code violations.
